SUMMARY

Frontend / Full-Stack Engineer with 7+ years of experience building production-ready web applications. Sole Frontend Engineer at IntellAct — built a B2B SaaS platform for aviation from 0 to production: real-time computer vision viewer with Canvas and WebSocket, role-based dashboards, and complex data interfaces. Strong expertise in React, TypeScript, and Vue. Full-stack experience with Next.js, Node.js, PostgreSQL, and MongoDB. Focused on clean architecture, performance, and delivering end-to-end.

SKILLS

Languages: JavaScript, TypeScript. **Frontend:** React, Vue.js, Next.js, React Router

State Management: Redux, Redux Toolkit, React Query, Context API, MobX, Zustand, Pinia.

API & Data: RESTful APIs, GraphQL (Apollo Client), WebSockets, Axios. **UI & Styling:** Ant Design, Material UI, PrimeVue, Tailwind CSS, CSS Modules, SCSS, Styled Components, Bootstrap.

Backend: Node.js, Express, Next.js API Routes. **Databases:** MongoDB, PostgreSQL.

ORM & Cloud: Prisma, Supabase, Vercel, NextAuth. **Testing:** Jest, React Testing Library, Storybook, Loki. **Performance & Optimization:** Code Splitting, Lazy Loading, Memoization, Bundle Optimization.

Build & Tooling: Webpack, Vite, Babel, ESLint, Stylelint, Prettier, GitHub Actions.

Advanced UI: Canvas API, Konva, React-Konva. **AI Tools:** ChatGPT, Claude, Copilot, Cursor.

PROFESSIONAL EXPERIENCE

Sole Frontend Engineer

IntellAct — AI-powered Ground Operations Platform (Modiin, Israel) | 2022 – Present

- Built and owned the entire frontend from 0 to production as the sole UI engineer in a ~20-person B2B SaaS startup providing real-time ground operations intelligence for airlines and airports
- Developed a real-time computer vision viewer: Canvas overlay rendering AI detection annotations on video frames received via WebSockets, with interactive filtering, timeline navigation, data tables, and modals
- Designed and implemented role-based access control (RBAC) across the entire application — pages and features dynamically controlled by user role
- Collaborated directly with backend engineers to design APIs and data structures for ML-powered analytics features
- Owned UI implementation decisions in collaboration with the Product Manager — from component layout to production
- Built scalable, responsive dashboards using React, Redux Toolkit, TypeScript, and Ant Design

Frontend Developer

Elpisor LTD (Rehovot, Israel) 2020 – 2022

- Contributed to a social platform for pet owners, enhancing communication and user engagement
- Developed secure authentication flows with token validation and encrypted communication, built reusable components with strong cross-browser compatibility, and integrated geolocation features for lost and found pet tracking

Frontend Developer

Vortex (Dnepr, Ukraine) 2018 - 2019

- Developed responsive e-commerce platforms and a weather application with cross-browser compatibility, implementing client-side logic for dynamic weather data rendering and automatic location detection

PROJECTS

Job Tracker | Next.js, React, TypeScript, Tailwind, AntD, Prisma, Supabase, NextAuth

- Full-stack job application tracking platform: pipeline management, interview scheduling, analytics dashboard, and data export
- Implemented authentication (credentials + Google OAuth), role-based routing, and server-side actions with Next.js App Router

Finance Tracker | Vue.js, PrimeVue, TypeScript, Express, Apollo, GraphQL, MongoDB

- Full-stack personal finance app: budget tracking, income and expense management, real-time data updates via GraphQL

EDUCATION

Dnipro University of Technology — Automation & Robotics (2023–Present)

Dnipro College of Computerization of Medical Equipment (2013 – 2016)

Adaptation Program for Software Developers — Tel Ran Computing Solutions Ltd
